

A hand is pouring water from a clear plastic measuring jug into a black container. The jug has measurement markings in liters and milliliters. The background is slightly blurred, showing some red and yellow structures.

Measures

A close-up of two hands with multiple colorful wristbands. The wristbands are in various colors including blue, green, yellow, and red. Some have text like 'GO' and 'WR'. The background is a clear blue sky.

Wristbands

A blue plastic seal is attached to a metal latch. The seal has a white label with the text 'Twoje logo' and the number 'A00000083'. The seal is made of a flexible material and is being held by a hand.

TECHNIQUES USED FOR PRINTING

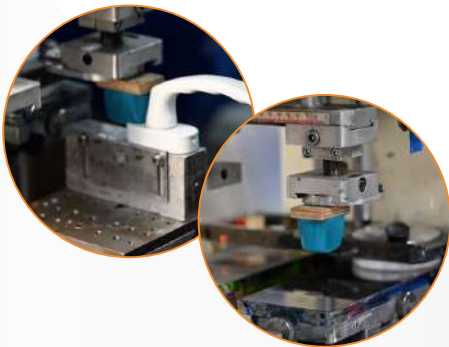

SCREEN PRINTING

The only method for permanent printing on plastics which allows products printed with this technique to be used in the agricultural, chemical, construction and food industries. Our screen printing inks are dishwasher safe, resistant to chemicals and abrasion. The advantage is the ability to print permanently without colour limitation, on any surface size (flat or convex).

PAD PRINTING

A method of permanent and fast printing on plastics, which that allows products printed with this technique to be used in the agricultural, chemical, construction and food industries. This printing technique is recommended for small products with a flat surfaces and limited printing areas with a small number of colours.

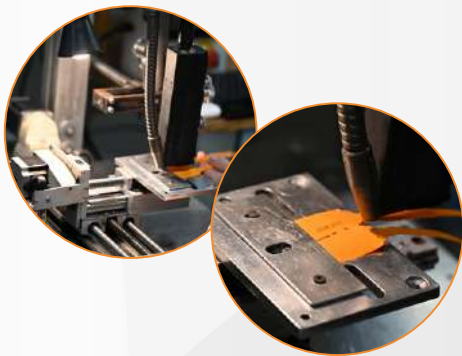

HOTPRINTER

It is a single-color printing technique performed using a heated matrix. The process involves embedding the design along with a layer of ink from a foil in the desired color onto the printing surface. The result is a slightly embossed print, often in metallic colors such as gold or silver. The advantages of this method include the durability and aesthetic appeal of the print, as well as the speed of execution.

INKJET

It is a contactless method of marking the surfaces of various materials by spray-applying colored ink onto a moving product. This technique allows for the permanent printing of not only text but also variable numbering, barcodes, and QR codes.

LASER

Laser printing, also known as laser engraving, is an advanced technology that enables precise and durable marking of various materials, including plastics. This process is based on the use of a laser beam, which, thanks to its high energy concentrated on a small point, thermally modifies the surface of the material.

mounting bracket
on the tube/rod Ø 20-24 mm

Grid TRAP NET

TRAPNET1

MOQ 100 pcs.

SET CONTAINS:

grid TRAP

3 indicators

Grid wich
protects bees

Principles of use:

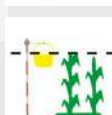

The vessel should be placed on the field just after seeding rapeseed in autumn and after the last snow melts in the spring. Install it approximately 15 m from the field edge, always at the level of the plants' top. It is recommended to use at least four vessels for each plantation.

Pour water with a bit of dishwashing detergent up to the half of the vessel's height. The addition of the detergent will reduce the surface tension of water which will make the pests immerse in it easier.

Monitor the vessel daily, i.e. count the immersed pests and read the pest limit threshold on the table printed on the vessel. Replace water in the vessel each time.

After exceeding the pest limit threshold, decide whether you want to spray the field.

The yellow vessel helps to diagnose the level of harmfulness done by such insects as: ceutorrhynchus, meligethes aeneus and dasineura brassicae.

Characteristics of FOLD PREMIUM+ Rain Gauges:

- vertical scale up to 40 mm with a measurement accuracy of 0.5 mm of rainfall,
- extended estimated scale up to 70 mm (storm scale),
- two indicators on the funnel (in different colors) for recording weekly, monthly, or annual rainfall,
- the collector allows recording cumulative rainfall up to 250 mm (250 l/m²),
- conical design of the mounting ring ensures optimal positioning of the rain gauge relative to falling rain as a measuring device,
- rain gauge protected by Patent No. 218270,
- rain gauge packaging protected by Industrial Design No. 18572,
- measuring device with a storm scale protected by EUIPO No. 008303481-0001,
- option to add custom printing,

Cleaning brush NOZZLE+

SZ00001

STANDARD COLORS:

MOQ 100 pcs.

COLORS OTHER:

MOQ 1000 pcs.

Professional cleaning brush for nozzles. Every nozzle operator must have it in his pocket. On the short side are two faults, which measure the diameter of following caps: **RAU - 17 mm** and **ARAG - 19 mm**.

There is also a notch for setting the nozzle at an angle of **8 degrees**. Next to the small hole are two insets.

This is also the key, that facilitates the tightening the cap to the nozzles with a width of **8 mm or 11 mm**.

Dial caliper MIL+

S000001

MOQ 100 pcs.

Practical, plastic dial caliper with inch scale.

Measuring range: **0~150 mm**

Accuracy: **+/- 0,05 mm**

Measuring range: **0~5 in**

Accuracy: **+/- 1/128 in**

The logo and scale can be imprinted in a custom color from the PANTONE color palette.

Oil can JUMBO 5 l

KOJ050001

MOQ 100 pcs.

JUMBO Measuring Can made from HDPE material with an embossed scale (liters and US quarts), featuring a flexible spout tip and a closing lid. Measurement range: **0,5 liters / 0,5 quarts** Maximum capacity: **5 liters**

Custom logo printing available in a chosen **PANTONE** color.

The jug is suitable for:

- Oils
- Gasoline
- Kerosene
- Antifreeze mixtures
- Brake fluid
- Electrolytes

Knife LIZARD

NL00001

MOQ 100 pcs.

A small, ergonomic and handy knife for opening envelopes and packages.

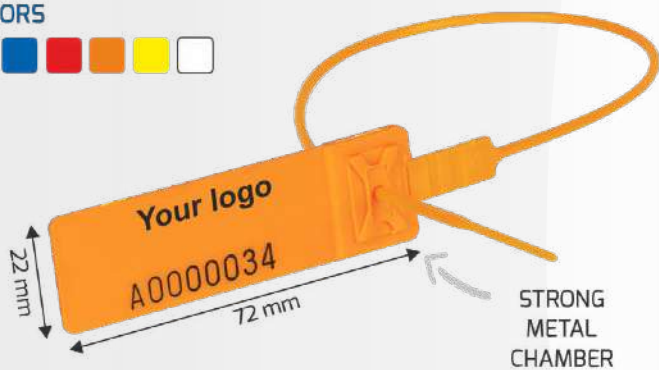

Pocket knife Lizard is intended for everyday use by everyone and also for companies in logistics departments.

Logo printing possible.

Sealed sample bottles

ONE CAP FITS ALL BOTTLE SIZES

FACTORY OR CUSTOM NUMBERING

FEATURES

- the cap breaks the sealing ring at opening attempt
- prevents access to the contents of the bottle to unauthorized people
- turning force minimum 4.0 Nm

USAGE

- storage of low octane fuel samples like diesel, food products, chemicals
- protection of liquid and loose products
- used by hospitals, laboratories, gas stations, shipyards, sea transport

BENEFITS

- unique numbering guarantees integrity, protects against industrial espionage and forgery
- bottles made material which meets the materials requirements intended to come into contact with food
- very easy assembly without any tools
- different cap colors make it easy to identify samples
- unique numbering allows for better control and ensures the integrity of samples
