# SWISS ARMY KNIFE™ SEGMENTATION

We know navigating different product categories can be confusing. Which is why we've simplified our Swiss Army Knife™ portfolio segmentation – so our consumers will be able to find exactly the right knife.

Our consumer-focused structure divides knives into four categories, or segments, depending on where and how they'll be used: Everyday, Outdoor & Sports, Trades & Crafts, and Accessories. Within each category, you'll find subsegments that focus on a specific use.

The **Everyday** segment includes products that make daily life easier, whether that's commuting to work, preparing food or enjoying family time. These are then subdivided into Essentials, Personal Care, and Food and Drink. They feature functions like a simple blade, nail file, USB stick, bottle opener, cheese blade and corkscrew.

The **Outdoor & Sports** segment is divided into Outdoor and Sports. These are knives for activities such as hiking, camping, wood carving with kids, hunting and sailing. Here you'll find specific functions like a wood saw, gutting blade and marlin spike.

## TRADES & CRAFTS

Within the **Trades & Crafts** segment are the subsegments Trades & Crafts, and Gardening. These products build, cut, mend and create with precision and skill, with tools like pliers, a metal file, a pruning blade, bits and flower knives to meet any craft challenge.

Finally, the **Accessories** segment contains four subsegments: Pouches, Chains & Paracords, Knife Care, and Books. Products in this segment perfectly complement and enhance Swiss Army Knives and multi-tools.

Our intuitive structure means our consumers can logically work their way through the segments to find the product they are looking for. They need to establish only where and how the knife will be used, to locate the ideal one. Simple.

## ACCESSORIES

# SWISS ARMY KNIVES SUB-SEGMENTS

## EVERYDAY

### Essentials

The iconic originals, the classic pocket knives that go with you everywhere, every day.

### Personal Care

The companions for simple grooming, whenever and wherever you need them.

### Food & Drink

The pocket knives that make sure you're prepared for every snack and gourmet treat.

## OUTDOOR & SPORTS

### Outdoor

The must-haves with the strength and functionality to take on the dynamic of the natural outdoors.

### Sports

The pocket knives that enhance outdoor sports with durable, reliable tools and functions.

## TRADES & CRAFTS

### Trades & Crafts

The smart tools with a multitude of functions, for everyone who loves to build, mend, improve and create.

### Gardening

The green thumb cultivators, for creating stunning floral displays and mastering any horticultural task.

## ACCESSORIES

### Pouches

The pouches that keep our multi-tools and pocket knives safe, protected and right where you need them.

### Chains & Paracords

The smart little extras that make our pocket knives and tools easy to carry.

### Knife Care

The accessories that enhance and maintain all our multi-tools.

### Books

The expert guides that offer everything from basic carving techniques to bushcraft tips.

# STAINLESS STEEL

All pocket knife blades, springs and tools are made from stainless steel. Making a blade that offers optimum functionality and durability requires the right steel alloy. The steel must ensure excellent edge retention and sufficient resistance to rust, but should also be flexible so that it does not break during use.

The following steel alloys are used for our Swiss Army Knives:

MATERIAL NO.	COMPONENT	ABBREVIATION AISI	C (%)	CR (%)	MO (%)	V (%)
1.4110	blade	X 55 Cr Mo14	0.48–0.60	13.0–15.0	0.50–0.80	≤ 0.15
1.4021	spring	X 20 Cr13	0.16–0.25	12.0–14.0		
1.4031	tools	X 39 Cr 13	0.36–0.42	12.5–14.5		0.1–0.2

All Victorinox alloys are in accordance with Regulation (EU) no. 1935/2004 for products that come into contact with food.

# SCALE MATERIALS

MATERIAL	DESCRIPTION
<p><b>Cellidor</b></p> <div data-bbox="280 656 331 707" style="border: 1px solid black; padding: 2px; width: fit-content;">CP</div>	<p>Cellidor is an organic, thermoplastic cellulose ester that incorporates a high proportion of renewable natural cellulose material. Unlike traditional plastics, it is only partially dependent on fossil fuels. Components made of Cellidor exhibit an exceptional high-gloss finish with perfect depth effect. To improve abrasion and scratch-resistance, scales printed with a special promotional motif are treated with a protective coating.</p> <p>Max. usable temperature 65 °C.</p>
<p><b>Acrylonitrile butadiene styren</b></p> <div data-bbox="280 943 331 994" style="border: 1px solid black; padding: 2px; width: fit-content;">ABS</div>	<p>Acrylonitrile butadiene styrene is an amorphous thermoplastic. ABS plastics exhibit excellent toughness, notched impact strength, impact strength, flexural rigidity and surface hardness.</p> <p>Max. usable temperature 80 °C.</p>
<p><b>Polyamide</b></p> <div data-bbox="280 1133 331 1184" style="border: 1px solid black; padding: 2px; width: fit-content;">PA</div>	<p>Nylon is a term commonly used primarily in the U.S. to describe polyamides (PA). Polyamides are suitable for pocket knife scales because they exhibit better mechanical abrasion resistance. This also has benefits from a production perspective. Compared to high-gloss and smooth Cellidor components, they have a more structured surface.</p> <p>Max. usable temperature 90 °C.</p>
<p><b>Aluminium</b></p> <div data-bbox="280 1352 331 1404" style="border: 1px solid black; padding: 2px; width: fit-content;">ALOX</div>	<p>Alox scales are punched from aluminium, embossed and then anodised in a subsequent process stage. The Eloxal process uses anodic oxidation to create a protective layer. This layer of oxide is hard and protects the scales from damage and corrosion, up to a certain degree.</p>
<p><b>Walnut Wood</b></p> <div data-bbox="280 1503 331 1554" style="border: 1px solid black; padding: 2px; width: fit-content;">WOOD</div>	<p>Wood is a natural, renewable resource. The walnut wood used by Victorinox comes from European forests and complies with the EU Regulation No. 995/2010 (the EU Timber Regulation). The wood of the walnut tree is very solid, tough and strong. Due to its different patterns every piece is unique.</p>
<p><b>Olive Wood</b></p> <div data-bbox="280 1727 331 1778" style="border: 1px solid black; padding: 2px; width: fit-content;">WOOD</div>	<p>Wood is a natural, renewable resource. The olive wood we use at Victorinox is sourced from Italy and complies with the EU Trading Regulation (EUTR) 995/2010 on timber. The wood from the olive tree is very heavy and hard and has good density characteristics.</p>
<p><b>Micarta</b></p> <div data-bbox="280 1877 331 1928" style="border: 1px solid black; padding: 2px; width: fit-content;">MIC</div>	<p>Micarta is a composite material where an absorbent carrier (cellulose, linen, wood, etc.) is soaked in synthetic resin. After the resin is cured, the Micarta is polished to create the desired finish. If different colored materials are used, the polishing produces a grainy effect. Micarta is a premium material and its waterproof and lightweight properties, plus its dimensional stability, make it the perfect material for the production of knife scales. In addition to its durable and robust characteristics, Micarta is very satisfying to the touch, with an elegant look that is pleasing to the eye.</p>

# PACKAGING

There are two types of packaging for pocket knives: Standard packaging and blister packaging.

## STANDARD PACKAGING

Standard packaging is defined as folded, sliding and gift boxes, as well as loose products. Standard packaging does not include hanging holes.

### EXAMPLE

## BLISTER PACKAGING

All blister packaging can be hung up thanks to the built-in hanging hole. The last part of the article number of products in blister packaging includes the designation "B1".

### EXAMPLE

# FUNCTIONS AND APPLICATIONS

Be best prepared for every situation with the Swiss Champ. The top model among the "Original Swiss Army Knives" combines high quality tools with 33 functions and an award winning design.

It is made of 64 individual parts and requires an astonishing 450 steps of fabrication in Ibach-Schwyz, Switzerland.

## OUTDOOR & SPORTS

# EXPERT KNIVES FOR OUTDOOR ACTIVITIES

- Strong, reliable knives with clever functions
- Ensure you're prepared for outdoor and sporting activities
- Designed and developed by experts to deliver high performance

From rugged terrain to tranquil countryside, the Outdoor & Sports segment houses our knives that are designed for activities in the fresh air. With a wide assortment for outdoor activities, like fishing, camping or hiking, as well as for sports like hunting, sailing or golf, it's the perfect choice for those seeking reenergizing outdoor experiences and a connection with nature. Whether your consumer needs a dedicated blade for gutting or a woodsaw for bushcrafting or carving with their kids, there's an effective tool waiting to lead the way.

## ACCESSORIES

# CLEVER ACCESSORIES FOR POCKET KNIVES

- Practical gadgets that provide additional benefits
- Offer well-thought-out enhancements for a pocket knife
- Cleverly designed with both functionality and style in mind

Featuring cleverly designed pieces, the Accessories segment perfectly complements and enhances each pocket knife or multi-tool. Each product brings valuable extra benefits, whether that's a sleek leather pouch or paracord pendant for safe storage, knife care tools or books with advice on outdoor skills and crafting. Handy, functional and impeccably crafted, these products augment our Swiss Army Knives and ensure your consumer can get the most out of their tools.

## CLEANING AND CARE

For dirty and sticky blades, we recommend opening and closing the blades several times in warm water until they move freely. Allow to dry completely. Add a drop of oil between the blades and the tool casing or springs as well as other friction surfaces.

Mutli-tools should never be cleaned in a dishwasher.

**We recommend:**  
**Multi-Tool Oil (item number 4.3302)**

Key features:

- Maintains tool mechanics
- Protects against corrosion
- Meets NSF H1 requirements VICTORINOX AG
