THE SUSTAINABLE GIFT MAGAZINE

WINTER 2022

Winter catalogue 2022

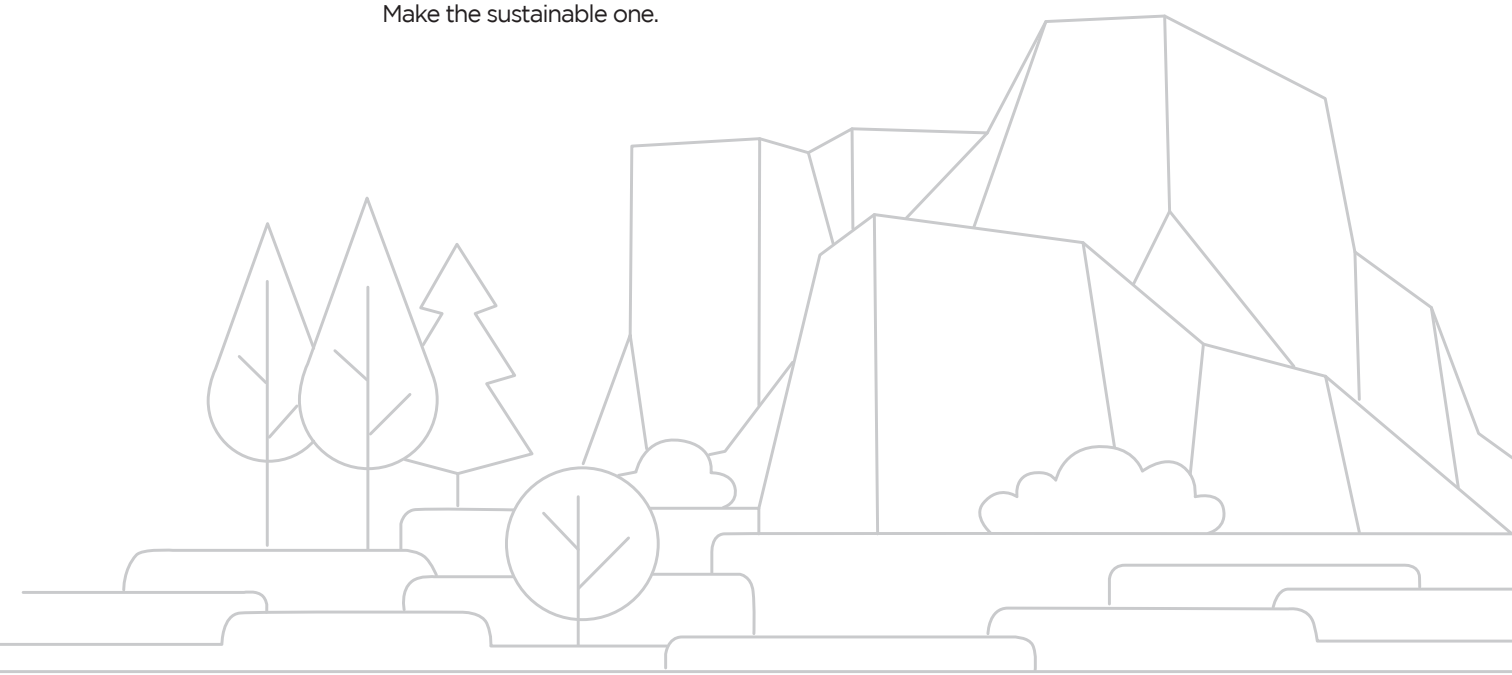

Welcome

You're about to browse through the most sustainable gift collection in our industry. Gifts made with proven recycled materials, gifts that helped save water during production and gifts originating from Europe.

Furthermore, we have executed a life cycle analysis (LCA) to indicate the carbon footprint (CO_2) of all products in this catalogue. The LCA is the only method to measure the total environmental impact of a product.

With more than 400 trendy gifts, exclusive brands and customisable gift sets, there is a perfect gift that fits your needs.

The choice is yours.
Make the sustainable one.

Icons

Most gifts in this catalogue have several sustainable elements, showing the impact the gift has on the environment. Below is an explanation of all icons used in this catalogue:

This number is the calculated indication of the product carbon footprint in kg through all lifecycles.

This logo indicates that the used recycled materials come from a 100% Recycle Claim standard verified supply chain.

This logo and number shows the savings of water during production in litres.

This logo indicates that the used recycled materials are from a 100% verified Recycle Claim Standard supply chain and at least with 95% recycled content by product weight.

This logo indicates that there is a donation of 2% on every product sold.

This logo indicates that the recycled material is from a 100% Global Recycled standard verified supply chain.

This logo indicates that there is a secure traceability of the recycled materials used in the product.

This logo indicates that this item is made from 50% certified recycled Tritan.

This logo indicates that the product and packaging uses paper, wood and bamboo from responsible sources.

This logo indicates that this item is manufactured in Europe.

Join us in our ambition to reduce CO_2 for a better planet.

4. Energy use

The data in this phase is a combination of the presence of a battery or electronic components and the expected energy use in the average product life span. Products without battery or electronics do not have any emissions in this phase.

5. End-of-Life

The data in this phase is a combination of the end of life treatment of both the product and the packaging. Based on collection, sorting and treatment and possible recyclability.

Global Recycle Standard (GRS)

The Global Recycled Standard (GRS) is a voluntary product standard for tracking and verifying the content of recycled materials in a final product.

The standard applies to the full supply chain and addresses traceability, environmental principles, social requirements, chemical content and labelling.

Our company is certified by Control Union, CU 1162221

GRS recycled plastic sunglasses | **P453.961**

Recycled Claim Standard (RCS)

The Recycled Claim Standard (RCS) is used as a chain of custody standard to track recycled raw materials through the supply chain.

The GRS/RCS logo ensures the materials used in the product are genuinely recycled.

Difference between standards

The RCS and GRS are the same, except that the GRS is a more rigorous standard; in the GRS, there is a higher minimum content percentage (50%) and additional processing requirements that must be met (social, environmental, and chemical). So GRS items have a higher recycled content than RCS items.

Our company is certified by Control Union, CU 1162221

RCS recycled plastic Ontario 6-in-1 retractable cable | **P302.373**

This logo is used when 95% of the product is made from certified recycled material.

This logo indicates that the used recycled materials come from a 100% Recycle Claim standard verified supply chain

Find our complete RCS/GRS collection on the following pages.

This product contains 36% RCS certified recycled ABS, CERTIFIED BY CONTROL UNION, CU 1162221

3.30kg. NEW

P329.421

RCS recycled plastic Lightboom 5W Clip speaker

Size 10 x 5 x 15,5 cm **Max. printsize** 8 x 15 mm **Print technique** Laser engraving

This product contains 38% RCS certified recycled ABS, CERTIFIED BY CONTROL UNION, CU 1162221

3.99kg. NEW

P329.461

RCS recycled plastic Lightboom 5W speaker

Size 13 x Ø 8 cm **Max. printsize** 30 x 8 mm **Print technique** Laser engraving

This product contains 45% RCS certified recycled ABS, CERTIFIED BY CONTROL UNION, CU 1162221

7.00kg. NEW

Forest Stewardship Council® (FSC®)

FSC® forest management certification confirms that the forest is being managed in a way that preserves biological diversity and benefits the lives of local people and workers, while ensuring it sustains economic viability.

FSC® certified forests have earned their reputation for environmental credibility, protection, healthy forestry, social engagement and the prevention of illegal forestation.

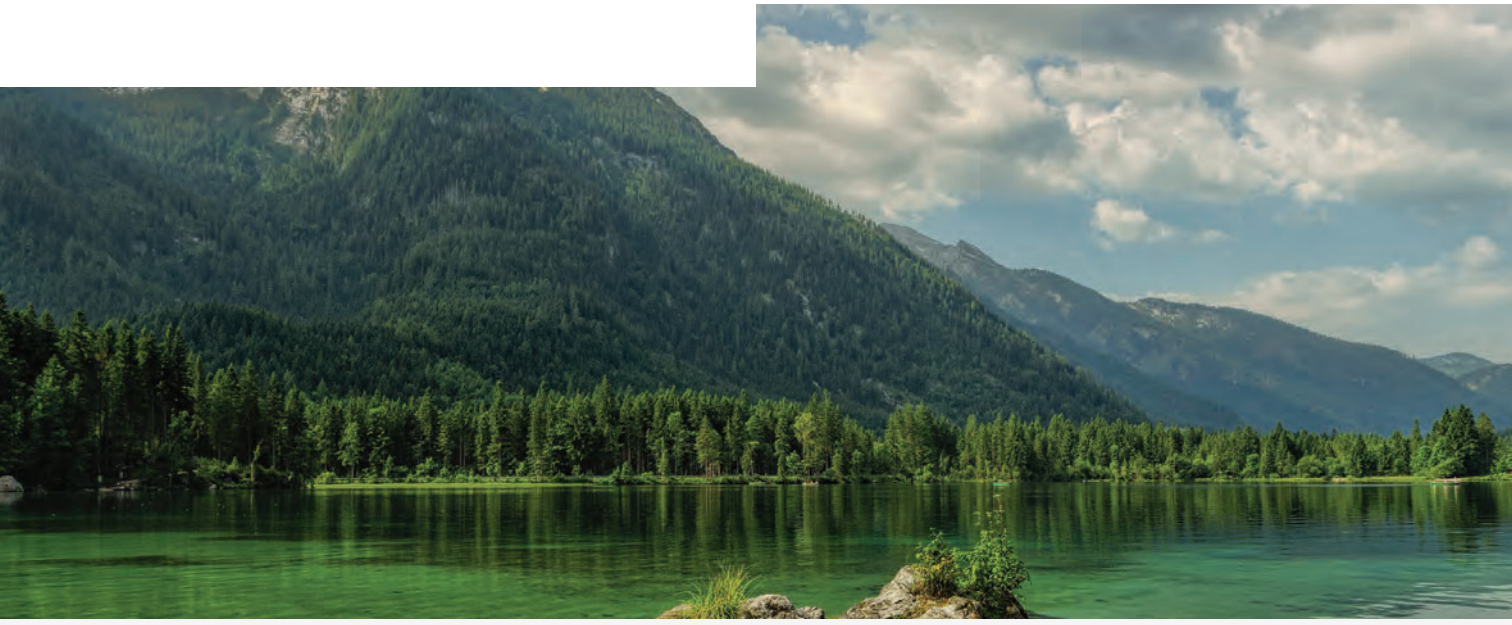

That's why we use FSC® certified wood and bamboo.

The true story of recycled materials

Don't trust what is **ON** the product (1)

but what is **IN** the product (2)

How? By using AWARE™ tracer & blockchain technology.

Stop greenwashing!

AWARE

Any item produced with AWARE™ tracer is easy to scan to scan with our hand held scanner. Through the combination of nano and blockchain technology final products can be authenticated in a few seconds.

Save millions litres of water with the IMPACT collection

AWARE

100% traceable recycled materials

Verified by blockchain technology

Saves water
